

UC Berkeley Expands Multimodal Transportation Training Series

[UC Berkeley Tech Transfer](#) is the California transportation community's source for professional training, expert assistance, and information resources. For the academic year 2016-2017, Tech Transfer is expanding our [Multimodal Transportation](#) training series.

California is on the forefront of making our transportation systems multi-modal, integrated, inter-connected, context-sensitive, safe, and sustainable. Our courses in [Multimodal Transportation](#) will help you transform your community to accommodate various travel modes beyond the motor vehicle and achieve the quality of life that you desire for future generations.

Below is a quick summary of our new training courses on Multimodal Transportation, mostly online. All courses have approved AICP CM credits. All of the following courses are subsidized for California local agency employees under the Caltrans Cooperative Training Assistance Program.
