

Transportation Planning Fundamentals for California Streets (PL-14)

October 8-10, 2019 at the Delta King Hotel in Sacramento
8:00 am - 5:00 pm

Registration: \$495 for California Public Agencies
\$990 Standard Fee

This course covers the planning and conceptual design of sustainable, multimodal, local streets and roads; the history of multimodal surface transportation planning in the US; the policy environment for sustainable, multimodal transportation; how to integrate multimodal transportation into the local urban planning process; and how to design local streets, intersections, crossings, and interchanges consistent with the sustainable, multimodal approach.
